

Test camera WI-FI signal

 **- Ubox -**

Part 1

Select a suitable location
for installation

Part 1

Select a
installation location
that can receive
2.4G WI-FI signals.

Part 2

Test **phone's** WI-FI signal strength

Part 2

① Making sure your phone is connected to 2.4G WI-FI.

Part 2

②Put your **phone**
close to the
installation location.

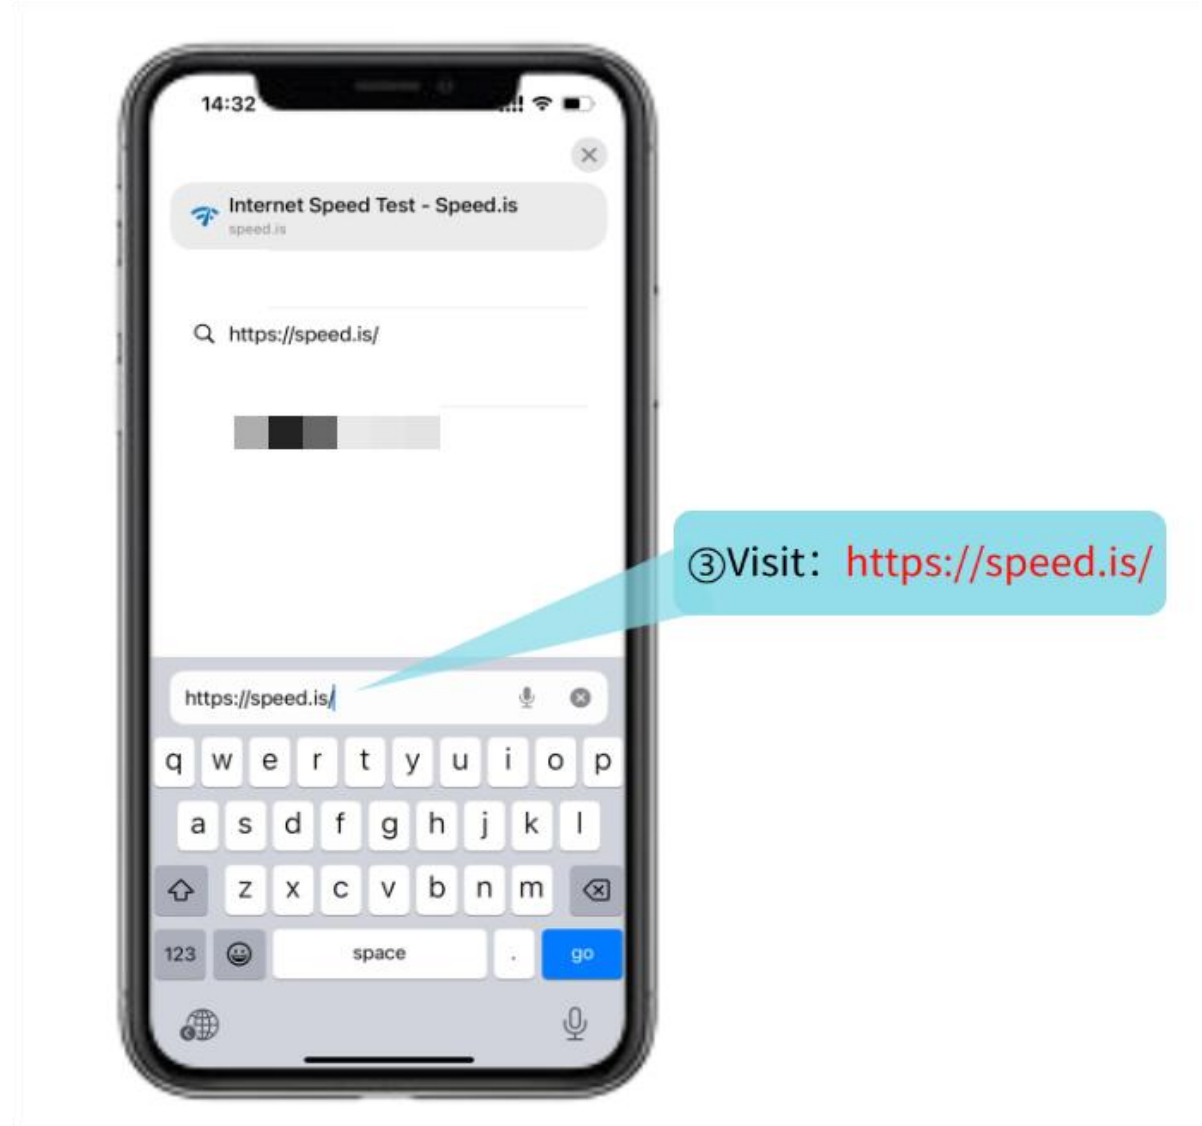

②close to the installation location

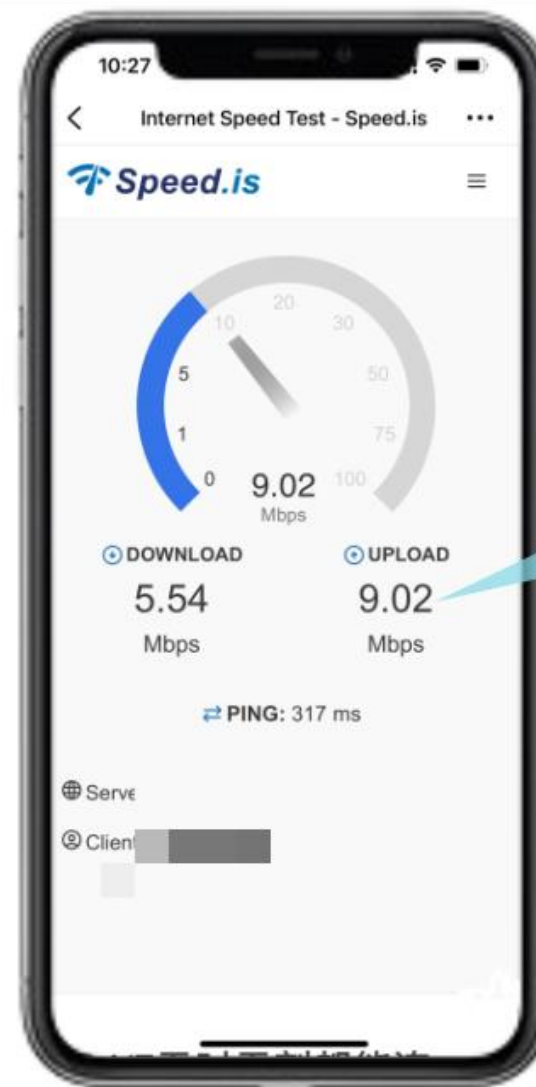

Part 2

③ Visit
<https://speed.is/>
on your phone's
browser.

Part 2

④ Check and Ensure the **upload** speed is above **3 Mbps**.

④ upload speed > 3.0 Mbps

Part 3

Test camera's WI-FI signal strength

Part 3

① Please check the
"Camera Setup
Quick Guide" to
connect the APP.

Part 3

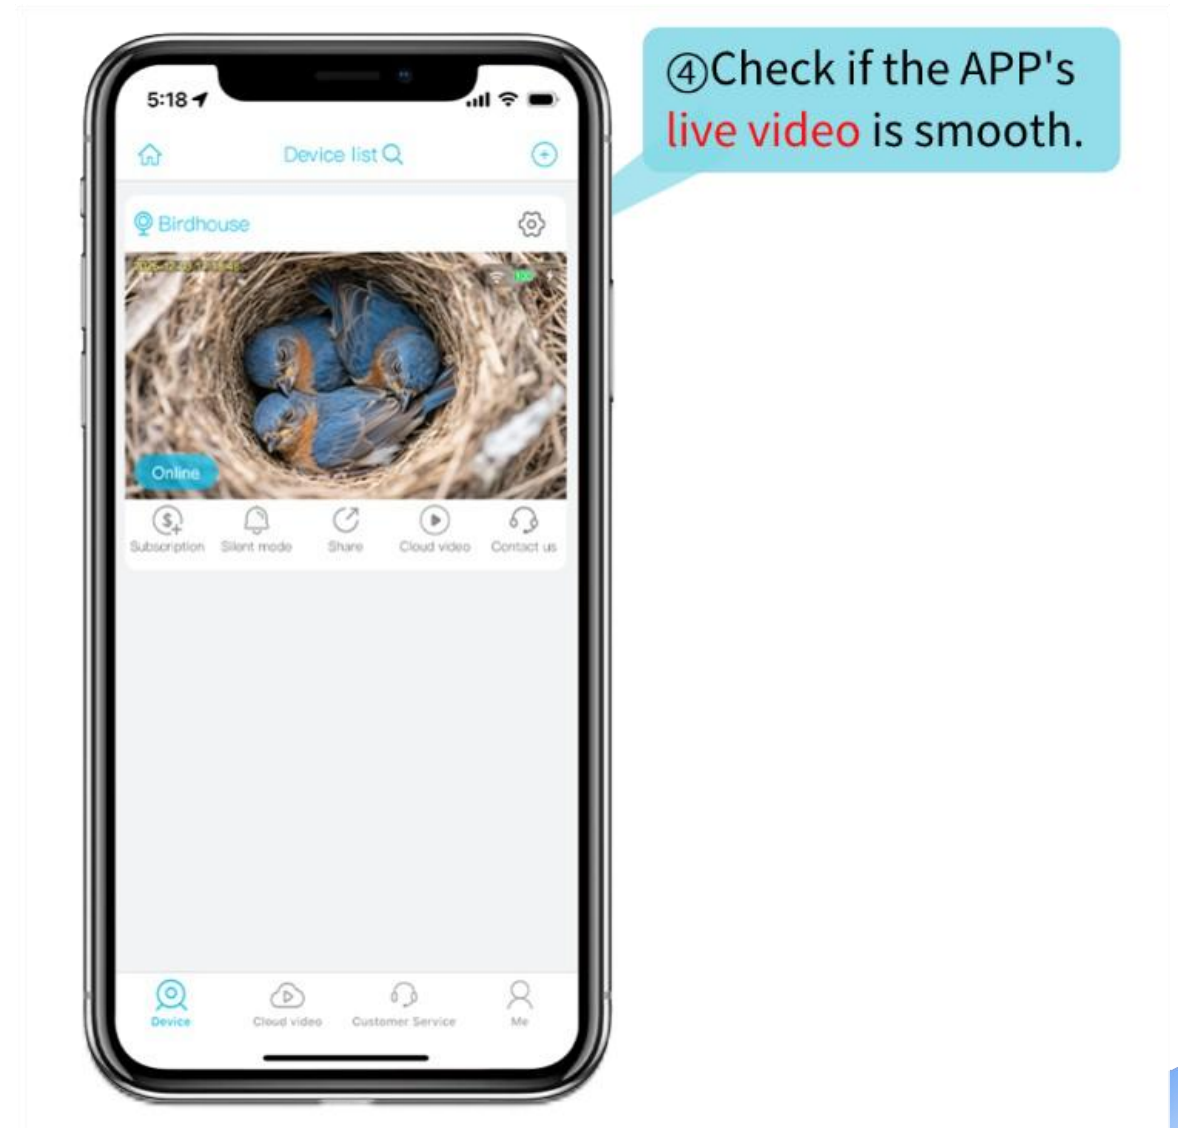

② Put the **camera** close to the installation location.

③ Open the “**Ubox**” APP on your phone.

④ Check if the APP's
live video is smooth.

Suggestion

If the **WI-FI** signal is weak, you may:

① Consider a **different installation location** that is closer to the **WI-FI** router.

② Adding a **WI-FI range extender** to extend the signal range.
